Flight Border Designs - A six piece Cluster kit

Designer Comments

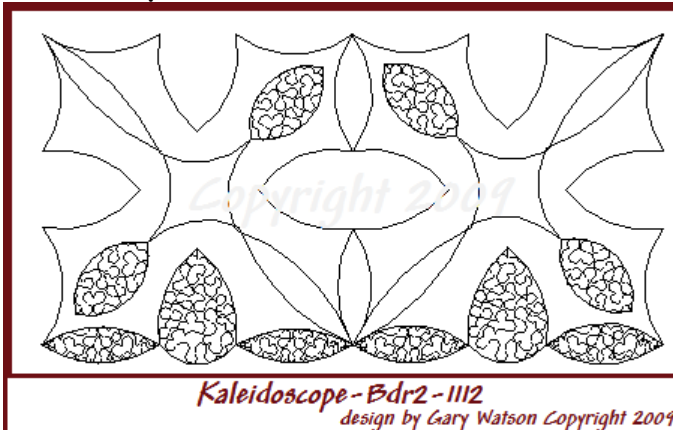

This month I decided to package these 6 border pieces as a cluster kit of border designs. There are:

- There is 1 filled corner pal, 1112 that is also done in a P2P version using a no sew line.
- Then there are two P2P versions of the corner design with an over stitch which will allow their use as border or sashing designs. There is one version with fill and another version without.
- There are two border Pals with differing degrees of fill around the edges which offer some unique effects when combined with either Blk 5 (above) or with the border pals by themselves (see below for illustrations).

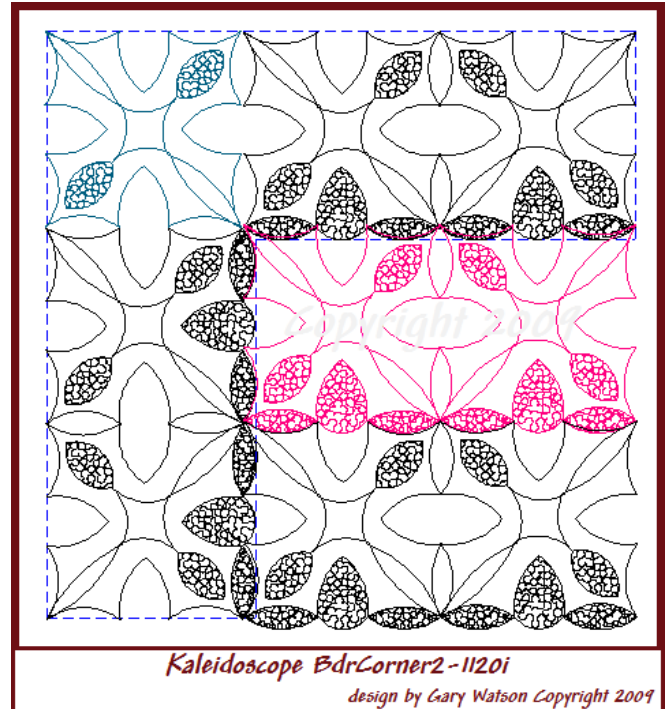

My intention was to provide a versatile set of pals to add design flexibility during quilting. Enjoy!

P.S. with this kit this 13 piece club set of pal designs is truly more than a BAKER's dozen!
